SOFTWARE ENGINEER

About me

I am a Software Developer who uses AI tools to build software quickly and efficiently. I love solving problems, debugging tricky code, and turning ideas into real apps. I am an exceptionally fast learner who easily adapts to new technologies, combining clean coding principles with AI to deliver great results.

Experience

Freelance Web Developer

Bra Okza Construction 2025 - 2026

Built and successfully launched the company's official website from scratch.

Built Internal CRM and ERP Systems.

Handled the full deployment and hosting process to ensure the site is live and secure.

Freelance Web Developer

Galaxy Projects Solutions 2026 - 2026

Built and successfully launched the company's official website from using AI.

Used AI-assisted development tools to accelerate building, debugging, and testing.

Education

(2024-2025) Software Development

Code College

Began learning frontend development using HTML, CSS, JS and React. Moved to backend development using Node JS, and PostgreSQL for data persistence.

I recently taught myself Python and FastAPI as it is the go to language and framework for AI development
